

Oakleaf Commission Moulding

Oakleaf Reproductions Ltd was established in 1969 to manufacture high quality simulated wood mouldings in cellular resin, a fine moulding material specially formulated to reproduce many of the characteristics of wood with accuracy, producing mouldings which are not only convincing in appearance, but sound and feel authentic also.

In addition to an extensive stock range, comprising rough-hewn oak beams, jacobean wall panelling, ornate cornice and frieze, carved panels, period mirrors etc., a commission moulding service is also available, where clients' own originals may be reproduced as required.

Particularly useful on restoration projects where large quantities of intricate yet repetitive carving are required, hundreds of metres may be produced quickly from an original of less than a metre in length, at a fraction of the cost of the hand-carved alternative. Supplied either stained in a variety of wood finishes, or ready for finishing by others, mouldings may be stained, painted or gilded.

- estimates available by return
- origination/carving service available
- sample moulding can be supplied within 2 weeks of receipt of original
- reproduces wood, stone and metal surfaces.
